Our Product Introduction

Product Description

PRODUCT DESCRIPTION

SUS304 Stainless Steel Coil 2mm 0.35mm Stainless Steel Coil

This is the most cost effective grade of steel. So the 304 Stainless Steel coil Price is lower compared to other grades of stainless steels and all metallic products in general. There are different versions of the material with low carbon and high carbon content. The coils and UNS S30400 Stainless Steel Strip Specification varies and the applications differ for the different versions of the material. The low carbon version, 304L coils are very good for welding applications as they have less carbide precipitation and less localized corrosion. The ASME SA240 Stainless Steel 304 Coil Thickness ranges up to 200mm and the width and the length ranges widely depending on the application requirements as well. Please contact us for more information and prices.

Product Description

Stainless steel does not stain, corrode, or rust as easily as regular carbon steel and provides high strength and impact resistance along with the aesthetic appeal. The material also has anti-bacterial qualities and is easy to clean and sanitize. **Stainless steel sheet** and **stainless steel plate** are both a perfect solution for applications that require a durable metal with anti-oxidation qualities.

We offer **Stainless steel sheet** and **stainless steel plate** with high quality and competitive price.And the material is manufactured by TISCO,BAOSTEEL,POSCO,LISCO and so on.Mainly used in architectural decoration, luxury doors, elevator decoration, metal tank shell, shipbuilding, train interior decoration, and outdoor engineering, advertising nameplates, ceilings and cabinets, aisle panels, screens, tunnel projects, hotels, guesthouses, entertainment venues, kitchens Equipment, light industry, etc.
